

## Programme Information

### Humboldt Research Award

Every year, the Alexander von Humboldt Foundation grants up to 100 Humboldt Research Awards to internationally renowned academics from abroad in recognition of their entire academic record to date.

Academics whose fundamental discoveries, new theories, or insights have had a significant impact on their own discipline and beyond and who are expected to continue producing cutting-edge academic achievements in future are eligible to be nominated for the award.

Academics from abroad, regardless of their discipline or nationality, may be nominated for a Humboldt Research Award. The Alexander von Humboldt Foundation particularly encourages the nomination of qualified female academics.

In addition, award winners are invited to conduct a research project of their own choosing in Germany in close collaboration with a specialist colleague. The project duration of six to twelve months may be divided into segments.

The award amount totals EUR 60,000. In Germany, research awards are generally exempt from income tax under German tax law. In addition, further expenditures (such as travel or language courses) are covered in the context of the invitation to stay in Germany for research purposes. For more details please refer to [General Regulations and Information for Award Winners](#).

#### **Nomination Entitlement**

An established academic who is employed by a university or research institution in Germany must take the initiative to nominate a candidate for the Humboldt Research Award. Self-nomination is not possible.

#### **Nomination Prerequisites**

The nominee's outstanding academic qualification must be internationally recognised and documented by corresponding successes in research, such as positively received academic publications or previous awards.

The Humboldt Research Award can only be granted once to any one academic. Researchers who have already received a research award for their academic achievements from the Alexander von Humboldt Foundation are not eligible to be nominated.

Furthermore, the nominee should not have recently won any awards or fellowships in Germany for his or her academic accomplishments; nor should the nominee have been in Germany for more than six months prior to the nomination. (If in doubt, please contact the Alexander von Humboldt Foundation in advance).

Nominating academics must guarantee that they can provide the necessary infrastructure for the award winner's own research projects or lecture tours (e.g. access to libraries, materials, facilities). German hosts are also expected to be well prepared for the award winner's research stay and to act as his or her personal mentor (e.g. finding accommodation).

### **Selection Procedure**

An independent Selection Committee appointed by the Alexander von Humboldt Foundation meets twice a year, in spring and autumn, to decide on the nominations in the respective round. Reviewing an application takes approximately six months. Nominations may be submitted at any time to the following address:

**Alexander von Humboldt Foundation  
Selection Department  
Jean-Paul-Str. 12, 53173 Bonn, Germany**

To make a nomination, please use only the current nomination documents, which can be downloaded from the Humboldt Foundation's [website](#).

Further information on the selection procedure can be found on the Humboldt Foundation's website and in the "[Guidelines for completing the nomination](#)".

### **General Regulations**

The research award recognises the entire academic record as well as the personality of outstanding academics. Therefore it is assumed that award winners have complied with the rules of good scientific practice and the relevant laws valid at the respective research location in their previous academic work and will comply with them during a possible research stay in Germany. For further details please refer to the [General Regulations and Information for Research Award Winners](#).
